

ESTHER NALENYI

Software Developer | Pega System Architect

esthernalenyi@gmail.com | +254 740 421 847 | Nairobi, Kenya | [LinkedIn](#) | [GitHub](#)

PROFILE

Results-driven Software Developer with experience in designing, developing, and deploying scalable, high-performance web applications. Proficient in modern frontend frameworks (React, Angular, Next.js) and backend technologies (Django and Python) with a strong focus on REST API integration, responsive user interfaces, and agile delivery. Adept at translating business requirements into technical solutions, collaborating in cross-functional teams and delivering products that drive operational efficiency. Passionate about leveraging technology to build impact-driven solutions that address real-world challenges.

SELECTED ACHIEVEMENTS

- **API Integration Excellence** – Partnered with a team to build and integrate multiple RESTful APIs in Django, improving backend efficiency and reducing data retrieval time by 25%. Familiarity with using GraphQL for API data fetching in frontend applications.
- **Operational Automation** – Built a React-based Expensify app that automated expense management increasing efficiency and accuracy .
- **Task Management Innovation** – Developed an Angular Task List System that streamlined employee task assignment and tracking.
- **Responsive UI Engineering** – Developed mobile-optimized, responsive interfaces using modern CSS, TailwindCSS and component-based frontend frameworks, improving accessibility and user engagement.

TECHNICAL SKILLS

- **Frontend Development** – React.js, Angular, Next.js, Vue.js, HTML5, CSS3, Chart.js, TypeScript, TailwindCSS, DOM Manipulation, Angular Routing, Media Queries.
- **Backend Development** – Django, Python, RESTful API Development & Integration (third-party services).
- **APIs** – FastAPI, REST API Development & Integration (third-party services) and GraphQL.
- **Databases** – SQL (PostgreSQL, SQLite), exposure to NoSQL.
- **Tools & Version Control** – Git, GitHub, Webpack, Redux.
- **Testing** – Jest (Unit & Component Testing).
- **Other Expertise** – Responsive Web Design, Single Page Application (SPA) Development, Agile/Scrum Collaboration.

WORK EXPERIENCE

Frontend Assistant Trainer | AkiraChix – Feb 2023 – Sept 2023

- Helped students debug their code during live lessons by the trainer.
- Reviewed assignments and gave feedback to enhance smooth learning.
- Helped students understand fundamental concepts like HTML, CSS and JavaScript.
- Prepared learning materials and updated course content to reflect current tools.

Software Developer Intern | Jambopay – Jan 2023 – Jul 2023

- Partnered with other developers to design and integrate RESTful APIs in Django, serving data to JavaScript-based frontends and improving system efficiency by 25%.
- Built and deployed the frontend for a Task List System using Angular, enabling smoother task allocation and real-time updates by 35%.
- Integrated frontend applications with backend APIs, reducing manual data handling and errors by 20%.
- Worked in an agile environment, participating in daily stand-ups, sprint planning and collaborative code reviews contributing to faster sprint delivery timelines.

Certified Pega System Architect (CSA) | Astrastellar

Feb 2024 – Aug 2024

- Successfully completed Pega training and passed the CSA exam.
- Completed training in case type design, user interface configuration, and workflow automation on Pega.
- Strengthened problem-solving and structured troubleshooting capabilities.

PROJECTS

Property Management System (React, Python(Django)REST API)

- Designed and built a full-stack property management platform for landlords and tenants.
- Built CRUD functionality for properties, tenants and maintenance requests.
- Developed RESTful APIs and connected frontend to backend.

 [GitHub](#)

Expensify App (React)

- Designed and built a web application that automates expense tracking, enhancing user efficiency and reducing manual errors.
- Integrated backend API for real-time expense updates.
- Wrote component test cases using Jest.

 [GitHub](#)

Clay Cast Homes (React)

- Developed design concepts and architectural plans for residential housing projects, focusing on functionality, aesthetics, and sustainability.

EDUCATION

AkiraChix – codeHive Diploma in Information Technology – Jan 2022 – Dec 2022

- Frontend Development - JavaScript, ReactJS, Angular, TypeScript
- Backend Development - Python, Django

REFEREES

1.Synthia Hunter Achieng – Software Engineer
